			MAIL DATE 01/07/2008	DELIVERY MODE PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

## Office Action Summary

Application No.

10/825,752

Applicant(s)

HUNG ET AL.

Examiner

Michael Brown

Art Unit

3772

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 23 October 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1,2,4 and 5 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-2 and 4-5 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-2 and 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hung '228 in view of Love, along with Powell and Kim

Hung discloses in col. 11, lines 65- col. 12, lines 40 a method for increasing a retrievable cell amount, substantially as claimed. However, Hung discloses massaging the breast. Love teaches in figures 1-7C a method for increasing a retrievable cell using a mild vacuum to the nipple to collect cells from the breast. Powell teaches in figures 1-3 using suction and vibration to obtain milk from the breast. Kim teaches using vibration that includes ultrasound to collect cells from the body (col. 3, lines 46-59). It would have been obvious to one having ordinary skill in the art at the time that the invention was made that vibration as taught by Powell and Kim could be substituted for massaging as disclosed by Hung because vibration or massaging can be used to stimulate the breast and cause cells to come from the breast. Applying vibration to the breast duct would definitely increase the amount of cells that could be retrieved and collected from the breast duct. Massaging, vibrating and applying a vacuum to the body

are interchangeable. All three are used to increase the flow of fluid from the breast (these fluids can include milk which will include cells). The vibration is applied externally to the breast as taught by Powell. Powell teaches applying warm water (heat) to the breast. Love and Hung teach collecting cells through ductal lavage. The massaging or vibration is applied externally and internally to the breast. In other words any massaging or vibration applied externally to the breast is inherently applied internally to the breast.

### ***Response to Arguments***

Applicant's arguments filed October 23, 2007 have been fully considered but they are not persuasive. Applicant argues that the prior art doesn't disclose or suggest a method of increasing a retrievable cell amount in a breast duct comprising the steps of applying vibration internally to a breast duct sufficient to induce cell sloughing within the breast duct and collecting the sloughed cells from the breast duct wherein applying vibration to the breast duct increases the retrievable amount of cells collected from the breast duct. However, Hung '228 was used to set forth the environment of retrieving cells from the breast duct. Love was used as a modifier to teach increasing retrievable cells using mild vacuum to the nipple (that includes breast ducts) to collect cells from the breast. Powell provides a teaching of applying vibration to the breast to obtain milk (which inherently includes cells). Kim was used as a modifier to use ultrasound to collect cells from the human body (which inherently includes breast ducts).

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Brown whose telephone number is 571-272-4972. The examiner can normally be reached on 5:30 am-4:00 pm Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patricia Bianco can be reached on 571-272-4940. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
